

## **Sandy's B.E.A.T.S. Presentation Tech Requirements Rider**

1. Lavalier clip on wireless mic with on/off control on beltpack.
2. A projector with a HDMI input (and HDMI cable) along with a screen(s) to display a PowerPoint Presentation.
3. I will arrange for a small acoustic drum set to be delivered, set up and picked up. THE USE OF A DRUM SET DURING MY PRESENTATION IS OPTIONAL AND TBD. THE DECISION IS MADE BASED ON THE WISHES OF THE CLIENT AND THE TIME ALLOTTED FOR THE PRESENTATION. THE USE OF A DRUM SET IS PREFERABLE HOWEVER.
4. If a drum set is used it DOES NOT need to be mic'd. I play along with tracks emanating from the PowerPoint Presentation. However, the FOH system needs to produce full bandwidth audio including a subwoofer in order to match the moderate volume level of a live drum kit. The system does not have to be overly large just appropriate for the room. Built in ceiling speakers are not adequate when a drum set is involved in the Presentation.
5. A 8X8 riser for the drums (if applicable).
6. The computer used to display the PowerPoint slides/audio is my MacBook Pro with the adapter /HDMI cable to connect with the house projector HDMI cable. I will provide an Behringer 802 - 4 ch mixer to connect my headphones to monitor the audio track emanating from my Mac while playing the drums live. FOH will get an audio feed as well (y cable).
7. A small table about 3ft H x 2ft W x 3ft L - Just large enough for my laptop, headphones, timer and water bottle etc. This table will be placed near the left side of the drums.

Please call or email me with any questions or concerns...Thank you!
